

Requirements

- ① Game will consist of a Board.
- ② Board can have snakes & ladders.
- ③ Landing on snake's head will take the person down to the tail.
- ④ Landing on ladder's bottom will take the player to the top.
- ⑤ The default way of winning is to reach the end of the board but we should have the mechanism to change it.
- ⑥ The default way of taking turns is Round Robin. But game should be extensible to support other ways as well.
